

FTM Theodolite Survey and Calibration Procedures with Checklists

Survey Checklist

Step	Task	Completed
1	Obtain authorization for runway access	☐
2	Ensure theodolite battery charged	☐
3	Position theodolite at centerline and threshold	☐
4	Level and power on theodolite	☐
5	Configure EDM and verify units in feet	☐
6	Align lens to runway centerline (zero ref.)	☐
7	Calculate distance from tables	☐
8	Place prism pole at calculated distance	☐
9	Mark survey location for calibration	☐
10	For offset: rotate 90° and mark location	☐

Calibration Checklist

Step	Task	Completed
1	Verify system power and Rack A active	☐
2	Connect cables and level theodolite	☐
3	Start FTM software and ping theodolite	☐
4	Pre-flight planning and pilot briefing	☐
5	Conduct constant altitude profiles	☐
6	Conduct glide path descent profiles	☐
7	Record data using FTM	☐
8	Generate calibration file (SysCal tool)	☐
9	Validate calibration with Look tool	☐
10	Perform post-calibration quality checks	☐
